# Self-Hosting

## Introduction

There are several platforms I self host on this server, this will outline some of them!

I generally run either Debian or CentOS on my home servers (and VPN instance). On my testing box, I use Proxmox to run VMs.

Here are some things you can host!

- Web apps/services
  - DokuWiki (Knowledge base)
  - PeerTube (Video sharing)
  - Nextcloud (File sharing/cloud)
  - Gitea (Git server)
- Other
  - Wireguard (VPN)
  - OpenMediaVault (NAS)
